

David F. Williamson received a B.S. in biology from Pennsylvania State University in 1972. From 1972-75 he was a Peace Corps Volunteer in Nepal. In 1980 he received the M.S. in International Nutrition for research on vitamin A fortification in the Philippines, and the Ph.D. in 1984 for research on famine surveillance in Indonesia, both from Cornell University. In 1984 he worked on public health surveillance of homeless shelters and meals-on-wheels programs for the New York State Health Department in Albany. From 1985-1987 he was an Epidemic Intelligence Service Officer in CDC's Division of Nutrition where he worked until 1994. He then joined the Division of Diabetes Translation and was Acting Director (1994-1996), and Associate Director for Science (1994-1998). From 1998 until 2007 he was Senior Biomedical Research Scientist in the Epidemiology and Statistics Branch. Currently Dr. Williamson is Visiting Professor in the Hubert Department of Global Health, Rollins School of Public Health, Emory University. In addition, he is Senior Science Advisor for Diabetes Prevention to the Division of Diabetes Translation at the CDC. Dr. Williamson's research interests include the long-term health impact of obesity treatment and primary prevention of type-2 diabetes. In 2006 he received the Sheppard Award, CDC's highest award for excellence in scientific achievement. He has authored over 150 publications. Dr. Williamson was a co-investigator on the Diabetes Prevention Program clinical trial where he helped develop the first economic analyses of the lifestyle intervention. Currently he is a member of the Economic Evaluation Committee of the Look AHEAD study a large NIH randomized controlled trial of weight loss and cardiovascular disease in persons with type-2 diabetes.
